

IN THE SPECIFICATION:

Please amend the paragraph on page 1, line 6, with the following amended paragraph:

The present invention relates to a plastic container for containing a liquid, such as toilet water or soy ~~source~~ sauce and, more particularly, to a plastic container for containing a refill and a method of manufacturing such a plastic container for containing a refill.

Please amend the paragraph beginning on page 5, and bridging to page 6, line 2, with the following amended paragraph:

The plastic container 1, similarly to conventional glass bottles and molded plastic containers, is used for containing a liquid, such as toilet water or soy ~~source~~ sauce and is capable of stably standing alone and resistant to the formation of minute leaks therein.

Please amend the paragraph on page 7, line 2, with the following amended paragraph:

As apparent from the foregoing description, the plastic container according to the present invention, similarly to conventional glass bottles and molded plastic containers, is used for containing a liquid, such as toilet water or soy ~~source~~ sauce

and is capable of stably standing alone and resistant to the formation of minute leaks therein. When disposing of the plastic container, the body can be squashed out and the plastic container can be compacted in a small mass.
